

Telecommunications Chambers—STAKKAbOX™

The STAKKAbOX™ Telecommunications range provides network operators with access chambers and hand holes for backbone or local access networks. Independently strong, the STAKKAbOX™ can be used in either the footway or roadway simply by changing the surface cover. Chambers come fully kitted with cable loop organisers and joint enclosure supports and with a prefitted floor/base with drainage. As the STAKKAbOX™ is a modular chamber, additional sections can be added to increase the depth if required. Surface covers to EN124 Lightweight Composite covers and steel frames or Concrete infill covers and steel frames, both to B125 for footway or one man easy access Hinged Ductile Iron covers and frames to D400 for carriageway. Both are lockable as an option for added security. If total security is required, Subsurface security covers are also available.

All STAKKAbOXes™ are made of 150mm interlocking sections, making increased depth simple to achieve. Cable and joint enclosure organisation is simple, with our prefitted cable management systems.

Access to deeper chambers is possible via prefitted steps

Duct entry is made simple using our entry connectors for smaller HDPE duct or Bellmouths for larger twin wall or PVC Ducts

Bases provide a finished floor with drainage hole

	Clear Opening		Maximum Outside		Section Depth	
	Length	Width	Length	Width		
	420mm	240mm	552mm	372mm	150mm	
	530mm	380mm	662mm	512mm	150mm	
	600mm	450mm	689mm	539mm	150mm
